DHRUB CHAURASIA

Vadodara, Gujarat | dhrubchaurasia@gmail.com | +91-6388415391 | LinkedIn | GitHub

PROFILE SUMMARY

Final-year CS & Engineering student (2027 passout) with strong fundamentals in data structures, algorithms, OOP, operating systems and computer networks, and 300+ DSA problems solved in C++. Backend-focused: built and deployed REST API services with authentication, persistence and LLM integration, plus hands-on AWS experience with load-balanced, auto-scaling deployments. Comfortable using AI tools in daily development while verifying behaviour and edge cases myself; seeking a Software Engineering Intern role to build reliable, customer-focused products.

EDUCATION

B.Tech, Computer Science & Engineering | Parul University, Vadodara 2023 – 2027
CGPA: 7.16

SKILLS

Languages: Python, C++, JavaScript (ES6+), Java (academic), SQL
CS Fundamentals: Data Structures & Algorithms, Object-Oriented Design, Operating Systems, DBMS, Computer Networks, Complexity Analysis
Backend & APIs: Node.js, Express.js, RESTful API design, authentication, MongoDB (NoSQL), SQL, relational database concepts, Postman (API testing)
Cloud & Reliability: AWS (EC2, VPC, IAM, S3, Elastic Beanstalk, EBS, CloudWatch), load balancing, auto-scaling, snapshot-based recovery
AI-Assisted Development: LLM API integration (Google Gemini), prompt-based workflows, AI coding assistants (ChatGPT, Claude) with manual verification of output
Tools: Git, GitHub, React.js, Redux Toolkit, Socket.IO, HTML5/CSS3, Agile/collaborative workflows

PROJECTS

VINGO — Full-Stack Food Ordering & Delivery Platform | *React.js, JavaScript, Redux, Node.js, Express.js, MongoDB, Razorpay, Cloudinary*

- Developed a responsive food ordering platform with dedicated dashboards for customers, shop owners, and delivery partners using React.js.
- Integrated Razorpay payment gateway for online transactions, alongside Cash on Delivery (COD), to support flexible checkout experiences.
- Built a delivery partner dashboard with order assignment management and delivery status updates to streamline the order fulfillment workflow.
- Implemented centralized state management using Redux to manage application data and synchronize UI updates across components.
- Integrated Cloudinary for image uploads and MongoDB for persistent data storage, supporting shop and food item management.

Vyntra — Full-Stack Stock Trading Platform | *Node.js, Express.js, MongoDB, React.js, REST APIs*

- Designed a multi-tier trading platform (client, backend server, admin dashboard) with a Node.js/Express backend and MongoDB persistence layer.
- Built RESTful APIs for authentication, portfolio, holdings, positions and watchlist management, structured as reusable, separately testable endpoints.
- Created a responsive React dashboard for portfolio visualization; deployed and managed all three services on Render using Git/GitHub workflows.

NexaAI — Full-Stack Generative AI Chat Assistant | *Node.js, Express, MongoDB, React, Gemini API*

- Independently designed, built and deployed an LLM-powered chat assistant end-to-end, from API design to UI.
- Built scalable REST backend APIs handling user queries, Gemini API responses, and chat history management with conversation context.
- Persisted conversation threads in MongoDB across sessions; debugged API rate limits, CORS and data-validation issues to keep the service stable.
- Built a React chat interface with markdown rendering, syntax highlighting and typing animation.

EXPERIENCE

Cloud Intern | EdiGlobe 2025

- Deployed a Python web application on AWS Elastic Beanstalk in a load-balanced, auto-scaling environment, with a custom VPC (public/private subnets, NAT gateway, route tables) mirroring a production topology.
- Set up least-privilege IAM roles, S3 storage and CloudWatch monitoring for observability; provisioned EC2 instances with custom security groups and EBS storage, including cross-region snapshot recovery.

CERTIFICATIONS

- Computer Networks — NPTEL (2025)
- AWS Certified Cloud Practitioner (2025)
- IBM Artificial Intelligence Fundamentals (2025)
- Guidewire DevTrails Hackathon Participant (2026)
